DEFECT REPORTING

NALEDI MOFOKENG
20240778

The following structured defect report documents all identified defects in the ULMS system. A minimum of 5 defects are recorded in the format required by industry-standard bug tracking practice.

Bug ID:	Module	Description	Severity	Priority	Status	Resolution
BUG# 001	Login	Error message wording ("Invalid login credentials .") does not match the required specification ('Invalid username or password')	Low	Low	Fixed	Update the MessageBox string to match the system requirement
BUG# 002	Login	System lacks empty-field validation; it processes blank fields as invalid credentials instead of prompting the user.	Medium	Medium	Fixed	Implement if (string.IsNullOrEmpty) checks before processing login requests.
BUG# 003	Course Enrolment	Module fails to prevent duplicate enrolments, allowing the same student to register for the same course	High	High	Fixed	Add a data integrity check to verify existing records before allowing a new enrolment.

		multiple times.				
BUG# 004	Marks Capture	Average calculation logic is incorrect and produces inconsistent results even with valid numeric data.	High	High	Fixed	Review and fix the calculation algorithm
BUG# 005	Marks Capture	Entering non-numeric data (text) causes an unhandled FormatException and a full application crash.	Critical	High	Fixed	Implement try-catch blocks and use double.TryParse for input validation.
BUG# 006	Reports	System displays a hardcoded name ("John Doe") on reports regardless of the student selected, and performance is slow.	High	Medium	Resolved	Implement StudentDataStore.GetStudentById(studentId) to fetch and display the specific student's name associated with the input ID and efficiency has been improved by using StringBuilder.

Summary:

- **Total Defects Raised:** 6
- **Status Distribution:** 5 Fixed, 1 Resolved (Pending Regression)
- **Severity Breakdown:**
 - Critical: 1
 - High: 3
 - Medium: 1
 - Low: 1
